

CONCOURS™

Kawasaki
Let the good times roll.

ILS SONT MAGNIFIQUES

SOPHISTICATED PERFORMANCE

The 1987 CONCOURS is a break-through motorcycle. In fact, it's two brilliant road machines in one.

The first is a solo superbike featuring an engine, frame, and suspension derived from our most sophisticated sports machines. The result is standard-setting performance, further enhanced by smooth shaft drive and radial tires.

The second machine is a fully equipped tourer, featuring a full-coverage fairing, spacious saddlebags, plush accommodations for two, and elegant, understated styling.

Once you slip into the cockpit of the CONCOURS, there's no looking back.

PERFORMANCE PEDIGREE

The 997cc powerplant features Kawasaki's latest performance technology—including separate liquid and oil cooling systems, dual over-

head camshafts, and four valves per cylinder.

Unlike a conventional sportbike engine, however, it has been engineered especially for mid-range response—offering exceptional horsepower and torque in the part of the powerband you use most.

FORM, FUNCTION & FINESSE

The CONCOURS hones the sport-touring concept to a very fine edge.

Its ultra-light diamond frame utilizes the engine as a stressed member to concentrate weight forward and lower the center of gravity for razor-sharp handling.

Air-assisted suspension systems offer a wide range of adjustability,

so you can choose the ride that's right for you.

Its sleek frame-mounted fairing slices cleanly through the wind. Leaving you and your passenger in a pocket of still air.

Yet overall weight is minimal, so its sporting nature is virtually uncompromised.

Negotiate twisty roads with confidence. Forget about downshifting when you roll on the throttle to pass. And eat up the miles in style.

The 1987 Kawasaki CONCOURS. Superbike or tourer, they're both magnificent.

Each saddlebag detaches with the flip of a single lockable latch.

Integral hooks let you strap gear on the hideaway rack in seconds.

- Dry weight is just 584 pounds with saddlebags—about 20% less than full-dress tourers.
- Radial tires front and rear offer sure-footed handling and long tread life.
- Three disc brakes with sintered metal pads ensure state-of-the-art stopping power.

- Liquid-cooled, 16-valve engine endows the leading performance tourer with phenomenal mid-range punch.

- 7.5-gallon fuel tank ensures a touring range of approximately 300 miles.

- A dynamic balancer cuts minor vibration for exceptional long-range comfort.

- Six-speed transmission with overdrive top gear lets the engine turn a relaxed 3,300rpm at 55mph.

- Wide, roomy seat offers excellent comfort and support for long tours or brisk sport riding.

- Kawasaki shaft drive is clean, smooth, and virtually maintenance-free.

SPECIFICATIONS 1987 ZG1000-A2

Engine	Liquid-cooled DOHC 16-valve 4-stroke In-Line Four
Displacement	997 cc
Bore x stroke	74 x 58 mm
Carburetion	Keihin CVK32 x 4
Ignition	Maintenance free electronic
Starting	Electric
Transmission	6-speed
Final drive	Shaft
Suspension, front	Air-adjustable equalized 41 mm fork
Suspension, rear	Air-adjustable UNI-TRAK® with 4-way rebound-damping
Tire, front	110/80 VR18 tubeless radial
Tire, rear	150/80 VR16 tubeless radial
Brakes, front/rear	Dual disc/disc
Seat height	32.1 in.
Fuel capacity	7.5 gal.
Dry weight	584 lbs.
